

PROJECT DESIGN PHASE-II

Data Flow Diagram & User Stories

Date	01 October 2026
Team ID	SWTID-2026-8273
Project Name	Implement Client Script & UI Policy (Incident)

Data Flow Diagram - Level 0 / Context View

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Service Desk Agent	Incident Creation	USN-1	As an Incident user, I can enter Incident details in the ServiceNow Incident form.	Incident form accepts the required Incident information.	High	Release-1
Service Desk Agent	Conditional Field Control	USN-2	As an Incident user, I can see fields become mandatory or change behavior when defined conditions are met.	UI Policy applies the configured field behavior correctly.	High	Release-1
Service Desk Agent	Dynamic Form Behavior	USN-3	As an Incident user, I can receive dynamic field updates when I change relevant Incident values.	onChange Client Script executes the defined action.	High	Release-1
Service Desk Agent	Auto-Population	USN-4	As an Incident user, I can have defined field values populated automatically when the business condition is met.	Configured value is populated without unnecessary manual entry.	Medium	Release-1
Service Desk Agent	Form Validation	USN-5	As an Incident user, I can be notified when required information is missing or invalid before submission.	Validation message is displayed and submission is prevented when the rule fails.	High	Release-1

Incident Manager / Administrator	Data Quality	USN-6	As an Incident Manager or administrator, I can ensure Incident records follow the configured client-side rules.	Users cannot submit records that fail the defined form validation rules.	High	Release-1
Incident Manager / Administrator	Maintainability	USN-7	As an administrator, I can maintain UI Policies and Client Scripts for Incident forms.	Rules can be configured, tested and updated in ServiceNow.	Medium	Release-1
